- Write a paragraph or two describing the software

This is the classic clue game but on mobile. You start out with a murder to solve and through going through the different rooms and searching for clues you eventually arrive at the conclusion of who the killer is , what they killed with and where the murder happened.

- Write a paragraph or two on your impressions of the software

This is the classic clue game I grew up playing plus more. I wouldn't use this in a classroom setting except for maybe a fun day. It is so much easier than the old board game when it is all on the screen in front of you and easier to keep track of your clues

- Does the software pass APPS: yes
