

- Title Frog Dissection
- Version 2.2.3
- Publisher or Producer GP strategies corporation
- Target Audience 12+, It can go down, I myself dissected a real frog through a summer program at age 10
- Type(s) of software with your justification

Simulation- this app is to provide a dissection of a frog through virtual means instead of killing real frogs.

- Curriculum(s) – can be used for science class

environment(s) and Why: single user- meant to be used by a single person although it may work with small groups. While it is mobile I do not believe it is something you should do on the go.

- Cost 3.99 initial purchase
- Write a paragraph or two describing the software

This software is for frog dissection. It walks you through dissection and even zooms in on the organs as you take them out to give you a good look. There are videos and games as well to help you learn more.

- Write a paragraph or two on your impressions of the software and possibly

This is a really useful app for science teachers in my opinion. It keeps it from having to be real dead frogs(which smell) from being used in classrooms. This makes it a lot easier to get children involved in the dissection if they don't have to get their hands dirty. It also cuts down on the amount of time needed to do such a thing in the classroom.

- Does the software pass APPS: yes
