

- Title: Holiday Dentist Office
- Version: Original
- Publisher: Cedric McClary
- Target Audience: 4+
- Type: Simulation – this simulates surgery, dentistry, pulling teeth, and personal hygiene routines.
- Curriculum: Personal care, life skills, human body
- Possible environments and why: Hygiene practice, discussion about personal hygiene, games for learning about the human body, time fillers. This is a good game for entertainment, but it will also bring awareness to taking care of one's teeth.
- Cost: Free, but in-app purchases are available: Remove ads for \$1.99 and "Super Teeth" for \$1.99. Can also get more characters, but price is unlisted.
- Summary: The software opens to a bright, cheesy, cheery Christmas scene. You can tap into the dentist's office at the North Pole and choose a character to work on. You must go through the process of drilling, cleaning, scraping, removing, and replacing the correct teeth, as well as washing the mouth out. When you are finished, you may take a picture of your new, grilled out character.
- Impressions: We like this app! It is simplistic and cheesy, but it does give a visual for what a dentist's work is like, especially when you don't take proper care of your teeth. This teaches children about the human body (the teeth), and it also paves a way for an excellent discussion surrounding personal hygiene and taking care of your teeth. Plus it's just fun and will keep kids entertained as well.
- Pass/Fail: Pass! We enjoyed this app.
