Title: BrainPOP Featured Movie

Version: 3.2.1

Publisher: BrainPOP

Target audience: 4+ 9-11

Type of software with justification: Discovery learning, because it gives the user total control over what he or she is going to learn.

Curriculum: This app offers science, social studies, English, math, arts & music, and engineering & tech

Cost: Free, $3.99 a month for some access, $9.99 a month for all access

Description of software:

      This software offers "movies" in which relatable characters with easy to listen to voices explain many different types of curriculum. This is done in an engaging way that makes it easy for users to learn difficult concepts.

Impression of software (how it will be used in a classroom):

      This app could easily be used in any classroom for teachers to allow students a break from a typical classroom environment. It could be used as an easy way to implement technology to familiarize students with iPads.

Does the software pass APPS?: Yes
