

Title: Explain Everything

Version: 5.5.12

Publisher: Explain Everything sp.z o.o.

Target audience: 4+

Type of software with justification: Tools, because the user creates the type of file.

Curriculum: A possible environment for this app would be anything that a teacher could use for a whiteboard. Also, the students can take notes or create posters for projects.

Cost: Free

Description of software:

This software offers the opportunity to create posters, take notes, draw, and organize ideas. Anything that you could do or present in front of an audience can be portrayed by using this app. Your creations can be shared to an entire class so everyone can see the work you've done.

Impression of software (how it will be used in a classroom):

This software could be used in any classroom as it can aid students in all aspects of learning. Its ability to organize ideas and present those ideas to many people can be very useful in a classroom and it should be shared with educators as a possibility in their classrooms.

Does the software pass APPS?: Yes
