

**Title:** Prodigy: Kids Math Game

**Version:** 3.3.4

**Publisher:** proDiGygame.com

**Target audience:** 9+

**Type of software with justification:** Drill and practice, because the information has already been learned and the game makes to practice math in order to progress.

**Curriculum:** 4-6 grade math

**Cost:** Free

**Description of software:**

This software is a game that puts users in a whole new world of cartoon character battle. In these battles, the user will have to answer math problems in order to cast destructive spells to defeat their opponents and move on in the game. It is great for drill and practice.

**Impression of software (how it will be used in a classroom):**

This app could be used as a fun alternative to answering questions, but takes too long to be used in an actual classroom. Educators should use it as a tool to recommend to students struggling with math concepts to play at home.

**Does the software pass APPS?:** Yes
