

Title: Total Recall

Version: 1.0

Publisher: Indrani Ghatore

Target audience: 17+

Type of software with justification: Drill and practice, because it allows the user to quiz themselves over vocabulary words.

Curriculum: Could be used in any curriculum that requires memorization of vocabulary words.

Cost: Free

Description of software:

This software is the best way that I have ever seen to memorize vocabulary. Its features allows the user to make multiple real life connections with the words before storing them for later practice. It also allows the user to use a web generated definition. There is not a better way to learn vocabulary than this application.

Impression of software (how it will be used in a classroom):

This software could be a student's best friend. It could be used in any classroom that requires learning of vocabulary and could easily be used and demonstrated in front of a class for review purposes.

Does the software pass APPS?: Yes
