

Making Maps Mini Lesson

Grade Level

- 5th

Technology

- Word processing
- QR codes

Curriculum

- Geography

The students will work with QR codes and Word Processing to learn how to make maps. Students will work individually to complete the assignment.

QR codes are placed around the classroom. Each QR code has information and instructions. Students will scan the QR codes and follow the instructions to learn about the parts of maps.

Students will use the word processing program of choice to create their own maps as they go through the QR codes. One map will be a historic map and the other will be a self-created map.
