

Vocabulary Mini Lesson

Grade Level

- 5th

Technology

- Osmos Words
- Total Recall App

Curriculum

- Vocabulary

The students will work with Osmos Words and the Total Recall app to practice their vocabulary words. Students will be given the list of vocabulary words for the unit.

They will work in pairs to use total recall to create flashcards of the vocabulary words. These flashcards will include the word, a definition, and a visual aid to help students recall the word. Once the students have created the flashcards with their partner, they will study the words for a few minutes. These are words that have already been used in class, so they should be familiar with the definitions.

Then students will use Osmos Words to practice spelling the vocabulary words. Osmos Words allows students to compete against each other. The pair is shown a picture describing the word and blanks where the letters would be, similar to hangman. Students used the letter tiles to begin to spell out the word. The faster speller gains a point. Pairs will compete against each other to practice spelling their vocabulary words.
