App Evaluations

Title	Videoshop-Video Editor
Version	V7.5.5.3 Updated 5 days ago 10/2/2019
Publisher	Jajijujejo Inc.
Target Audience	Rated for ages 4 and up. Would work well in k-6th grade classrooms.
Types of Software	This app would be classified under the tool app because it allows the user to edit videos, and create videos for projects.
How software fits into curriculum and classroom environment	The software can be used for a multitude of things in the classroom. Group projects is something my partner and I think this app would be perfect for. The teacher can use this software for multiple subjects.
Cost	There is a free version and a paid version. The paid version is one payment of 9.99$ The paid version isn't that different from the free version. In our opinion the user can get the same amount of use out of the free version as the paid version. It isn't worth 10$.

App Evaluations

Software description	Video shop is a free video creation app. Users are able to cut out unwanted areas of a video, add music to the selected video. Other aspects of this app are: sound effects can be added, voice overs can be used, text over the video can be added, it is also shareable to Facebook, Instagram, YouTube, snapchat, Vinemo, Dropbox, Whatsapp, and E-mail.
Possible Implementations	This app can be used both by teacher and student. The teacher can use this to edit out videos to only show the necessary information. Students can use this app to create videos for group projects.
Does the software pass APPS?	My partner and I liked this app and give it a passing score.
