App Evaluations

Title	BrainPOP Featured Movie
Version	3.1.9
Publisher	BrainPOP
Target Audience	4+ (made for ages 9-11) We both believe that this is the main targeted audience. Sarah used to use brain POP to review quick facts before an exam when she was younger.
Types of Software	The Two types of Software are Drill and Practice and Tutorial.
How software fits into curriculum and classroom environment	This software fits into the curriculum because us, as teachers, can use BrainPOP to reiterate lessons about science, or history, or be a pre-lesson to a new unit (a way to introduce new material).

App Evaluations

Cost	BrainPOP is free with additional subscriptions (if chosen) BrainPOP full access $6.99 BrainPOP explore: $2.99
Software description	The Drill and Practice is seen through having older information to review, but Tutorial is seen, because some of the information is new to the user.
Possible Implementations	In our future classroom, we both plan on using BrainPOP to showcase new material and reiterate older material.
Does the software pass APPS?	We both agree that this app passes the test. In our future classroom, we both plan on using brain POP to reiterate specific lessons.
