App Evaluations

Title	QR Code- Reader and QR creator
Version	1.0.1
Publisher	Chen Ying
Target Audience	4+, We both agreed that although it was 4+ a four-year-old might not be able to create a QR code or need to create a QR code.
Types of Software	The type of software we chose was tools, because this app allows users to create QR codes to put on business cards, phone numbers, web links, etc.
How software fits into curriculum and classroom environment	This software fits into the curriculum because we, as teachers can create QR codes to use on individual assignments and/or test.
Cost	This app is a free app, with no additional in-app fees.

App Evaluations

Software description	The software is tools, because the user is able to create some type of file, or in this case a QR code.
Possible Implementations	A teacher might use this app to create a QR code for a specific test or assignment. A teacher could also potentially create a QR code for attendance.
Does the software pass APPS?	Yes, we both agree that this app passes our standards. We both agree that this app will be more useful for a teacher than a student.
