

**Title:** Brainpop

**Version:** 3.1.9

**Publisher:** BrainPOP

**Target:** The targeted age group for this app is 4 years old and up. However this app is technically made for ages 9-11.

**Curriculum:** This app does fit into the curriculum because there are many different educational videos you can watch and even take tests on. The teacher can choose what they want the lesson/video to be over, these videos are more rule based.

**Environment:** This app could be used inside or outside of the classroom. It would be a great app for either one really it doesn't require much guidance.

**Cost:** This app does have in app purchases if you want the full versions.

BrainPOP full access subscription \$6.99

BrainPOP Explorer Subscription \$2.99

**Description of Software:** This software allows students to interact with the lessons and pick different videos and learn about things that they need to know. When they are done watching the video there are a few options for them including a unquiz that they can take to assess how they did with paying attention.

**Impression of Software:** My impression of the app is at first kinda confusing because of the way it looks when you open it however once you get to looking at it, it's actually really nice and not that hard to navigate. The videos and different quizzes and activities are great and make the learning fun.

**Pass:** This software passes the education software evaluation form because it has great videos with awesome quizzes and is easy to navigate.
