Title: QR Code Reader

Version: 2.3

Publisher: TinyLab

Target: This app has a rated 4 years old and up, but would be harder for younger students to navigate. A great audience for this software would be teachers to distribute private information or groups. The students could receive the codes to read online materials.

Curriculum: This app does not fit a curriculum directly, but can be utilized to distribute course material and assessments.

Environment: This app can be used for academic reason as well as daily life.

Cost: This app is free, but includes in app purchases for additional benefits.

Description of Software: This software sends messages and gives access to private pages and materials.

Impression of Software: I found this software to be difficult to navigate and unconventional for the academic environment at first, but I slowly start to understand how it could be beneficial. I recommend spending a lot of time to get to know the software before try to utilize the benefits.

Pass: This software passes the education software evaluation form because in the end it would be a great class tool.
