Title: Splash Math

Version: 5.6.9

Publisher: StudyPad, Inc.

Target: The targeted age group for this app is 5 years old and up. This app is best used for students in 1st grade through 5th grade. The app is very easy to navigate and parent friendly so students as young as 5 years old could easily understand it.

Curriculum: This app does fit into the curriculum because it allows students to broaden their mathematical skills and test their knowledge. The students pick the grade they're in, so it follows the curriculum for their age group.

Environment: This app could be used inside or outside of the classroom. The app could be used during a math lesson and students could practice the skill outside of the classroom.

Cost: The app is $9.99 after one free week.

Description of Software: This software allows students to test their mathematical knowledge based on their grade level. On the app you can set reminders to get on the app and practice. This app is very parental friendly and makes sure students know how to safely operate the app.

Impression of Software: My impression of the app is very good. I find this app to be very helpful and lets students get a better grasp on their grade level math skills. This app also is very parental friendly so students do not find something inappropriate.

Pass: This software passes the education software evaluation form because it allows easy access to all aspects of the app and is free.
