Title: Toontastic 3D

Version: 1.0.5

Publisher: Google LLC

Target: The targeted age group for this app is 4 years old and up. This app is best used for students in 1st grade through 5th grade. The app is fairly easy to navigate but could be a little complicated for kindergarteners.

Curriculum: This app does fit into the curriculum because it allows students to use their imagination and come up with ways to create a story with the given storyline.

Environment: This app could be used inside or outside of the classroom. The app could be used to create projects for a lesson in the classroom. This app also could create peer interactions.

Cost: The app is free with no upgraded versions.

Description of Software: This software allows students to follow a storyline to create movies. The storylines are not hard to follow and there are a good number of storylines to choose from.

Impression of Software: My impression of the app is good. The colors are very appealing and the interactions with the app is very helpful and useful when making a movie. The colors help it seem very child friendly and more fun to use. The only thing wrong was the music coming on even when the device is on silent.

Pass: This software passes the education software evaluation form because it allows easy access to all aspects of the app and is free.
