

Title: Total Recall

Version: 5.0

Publisher: Zyense

Target: The targeted age group for this app is 4 years old and up. This app is more of a tool for teachers and just partly interactive to students. I think 4 may be a little young for this but it would be good to use as a tool to teach.

Curriculum: This app can be very helpful for the teacher to make a web plan for any lesson. So yes I would say it would be good for any curriculum.

Environment: This app could be used inside or outside of the classroom. It's more of a teaching tool to add to lesson plans but it can be used outside of the classroom too if needed.

Cost: This app is mostly free there is just one in app purchase Mind Map Unlock for \$1.99.

Description of Software: This software allows teachers to create a web with anything they want in it, it can even be interactive. The students can also use this as a tool to create their own web.

Impression of Software: My impression of the app is good first by just seeing all the colors and how easy it is to design your own web map. This app is very easy to use and can even be used by the students after you show them how it works. This is not only a great tool for the teacher but also a great way to incorporate web making into a lesson as well. The colors are very appealing as well as the different shapes and how easy the app is to navigate.

Pass: This software passes the education software evaluation form because it allows easy access to all aspects of the app and is a great tool.
