

Hi, Parents/Guardians! Did you know Acceptable Use Policies can be used at home as well? It is important to create an AUP for home use because it teaches your child to follow rules and take responsibility for their actions. It also gives your child guidelines as to what they can and cannot do while using technology and the Internet, and it allows them to be aware of the consequences when rules are broken.

It is very simple to create one. I will provide a template, and all you need to do is write a few rules and consequences that you would like to implement in your home, for the use of technology, and the Internet.
