App Title: Clips

Publisher or Producer: Apple Inc.

Version of App: 2.1

Target Audience: 4+, but we would recommend it for 8+

Type(s) of Software: Tools – the user creates the desired type of file – Clips App is used to create a video.

How does it fit into the curriculum? This app allows users to make videos. The videos could be used for projects on certain topics.

Cost or in-app purchases: Free – no in-app purchases.

Description of the Software: The Clips app is great for making videos and posters. When making a video, you can record it and add music, filters, subtitles, text, and stickers. You can also make easy, fun posters and add pictures, text effects, stickers, and music. The videos and posters are also shareable via message, E-mail, notes, and many more different Apps.

Impression of the Software: This App would be useful in the classroom to create videos for any kind of project. Students could make a video describing a topic with fun effects or they could even make a poster with pictures and text. We do not feel like there are any bad aspects of the app. It is very fun and easy to use!

Does the software pass APPS: Yes
