- 6th Grade
- Social Studies – Continents
- Google Docs and Padlet

Synopsis: At the beginning of the lesson, I will explain the directions. Then I will put students into groups of three and assign one of the seven continents for each group to research. Using a Google Doc, each group must answer questions about their continent concerning the five themes of geography: location, place, region, movement, and human-environment interaction. They must also include at least five interesting facts about the continent. Questions will be posted on the board. When each group has collected all the information, they will need to share the Google Doc with me so I can check to make sure all the information is there. Once I have approved, each group will need to create a Padlet board with all their continent's information. The Padlet boards must be organized and creative. Each group will present their board to the class.
