

Evaluation Write-Up

Group Member Names: Sydney Sweat, Corey Anderson, Katie Anderson

App Title: Hopscotch

Publisher or Producer: Hopscotch Technologies

Version of App: 3.40.1

Target Audience: 4+, made for ages 9-11

Type(s) of Software: Tutorial – This app teaches users how to code.

How does it fit into the curriculum? This app can be used for coding.

Cost or in-app purchases: Free to download, but if you want to be able to create and save more games, you have to make an in-app purchase of \$7.99/month or \$79.99/year. It also lets you try it free for 7 days before you make the purchase.

Description of the Software: This app has video tutorials that users can watch in order to know what to do. On the tutorials, there is someone explaining what to do. There also are many templates to choose from and ways to create the codes that the user wants.

Impression of the Software: Learning how to use this app could take some time for a young student, but once it is learned it would be very fun and easy to use. We were very impressed by how in depth the tutorials were and that there was someone talking you through how to create what you wanted. Overall, this app was very fun to use, and we feel like it would be great for use in the classroom.

Does the software pass APPS: Yes
