
Explain Everything

- Version: 5.3.6
- Publisher: Explain Everything sp. z o.o
- Target Audience: Age group would be 4 years and up. Although, there is a lot of reading involved, so that should be taken into consideration.
- Curriculum: This app would fit perfectly into almost any subject or project. It could be used by all students individually or as groups.
- Cost: The app had a “lite” version where everything was free for 14 days. Then we could upgrade to monthly for \$12.99 or yearly for \$107.99.
- Describing the Software: This app is more of an interactive whiteboard that lets users collaborate and work together easily. They have templates you can access or just create your own project.
- Impressions of the Software: This is a great interactive app for lessons. We could create our lesson plan with a video and even add our voice in the background.
- Pass: This software does pass because everything inside the app was informative and educational without supervision.
