QR Reader

- Version: 2.3

- Publisher: Matan Randomski Productions

- Target Audience: Age group would be 4 years and up.

- Curriculum: This app would help students get to websites easier, learn about technology, and even send notes to their friends.

- Cost: The app is completely free!

- Describing the Software: This is a great way to let the students explore websites faster. All they have to do is scan the barcode and it takes them where they need to go.

- Impressions of the Software: This app is a great way to just have fun for the students. It would be like sending a secret note to their friends.

- Pass: This software does pass because it does showcase how technology works and could be used to navigate the web easier.
