Total Recall

- Version: 5.0

- Publisher: Michel Neuhaus

- Target Audience: Ages 4 and up.

- Curriculum: This app would be great for any subject. It allows you to create all types of webs and links.

- Cost: The app was completely free.

- Describing the Software: It is kid-friendly and looks fun. It is a lot like Inspiration but a little kid-friendlier.

- Impressions of the Software: This app was easy to start out. It gave little tutorials on how to do things. It's like making a digital map with links that you can maneuver with your fingers.

- Pass: This software does pass because everything inside the app was informational and educational. The price is amazing and as long as there is a specific lesson plan with instructions, this app would be great for anything.
