

# Storyboard for Personal VPOD

Background information about yourself (Where you were born and where you live, your family)

- Hello, my name is Kamari Cantwell. I am a Junior at Arkansas State University. I was born at St. Bernards in Jonesboro AR. I live in Brookland AR and I have always lived in Brookland. A few things that I enjoy doing are going to the lake, going to the beach going to the movies, eating ice cream, and spending time with my family, friends, and Fiance. I have one brother named Kadyne Cantwell and my parent's names are Krissy and Jason Cantwell and I also have a goldendoodle named Charlie Belle who is about to be two years old on December 23. Charli Belle is a funny dog! Her favorite things to do include: bubble baths, stroller rides (because she is too lazy to walk), run extremely fast in small circles, and eat lots of peanut butter bones. Charli takes bubble baths almost daily she absolutely loves it. If someone is taking a bath and doesn't let her in she will sit outside the door and cry. Anytime I have homework for classes, Charli will sit beside me on her bed until I am done. It is a joke at our house that when I graduate college, Charli Belle will need a diploma too. Charli will be at my wedding in May as the dog of honor. I recently got engaged to Cade Jonah Gramling on December 15, 2018
- Here is a little bit about the proposal On December 15, 2018, my best friend asked me to marry him! My friend, Meredith, myself, and my mom had been planning a trip to New York City for about a year. We have always wanted to see NYC at Christmas time. Little did I know, Cade had been planning something special as well. The first two days we were in NYC, were jam-packed with activities. On the third day, we had planned on spending most of the day at the Rockefeller Center. We went to see the Radio City Rockettes Christmas Spectacular show that morning, we ice skated that

afternoon and then planned to go up to the Top of the Rock at sunset. We arrived at the first lookout and it was absolutely beautiful. As I was taking in the sites of the beautiful city below me, someone tapped me on the shoulder. My first thought was that someone probably wanted me to take their picture. As I turned around, I saw Cade standing in front of me with a little black box. He said something and then got down on one knee. When I saw him, I was in so much shock that I am not sure what he actually said or even what I said but somehow I ended up with a ring on my finger, so I must have said yes! I was completely shocked and overwhelmed with joy!in New York City at the Top of the Rock. We are getting married on May 16th of 2020, so planning a wedding and going to school has been a little stressful for me.

Your hopes and dreams

- My hopes and dreams are to graduate from Arkansas state university and become an elementary education teacher. After that, I would love to get my Masters's degree and teach in my hometown at Brookland Elementary School.

A brief version of your philosophy - discipline, diversity, constructivism or how your class will be run .....

- For Discipline in my classroom, I really like what Brookland does. Each morning the children move there clip to Bearcat black which is what they are supposed to stay on. If they misbehave they move to have to move their clip down.
- For Diversity in my classroom, I would like all of my students to be treated equally. Not only by me but by my students as well.
- In my classroom I want all of my students to have an equal opportunity to learn. Even If that means I will come in early or stay late to work with students who are behind.

How will you use technology in with your students AND as a professional (include professional development)

- Our technology class has taught many so many different things that I can integrate into my classroom. Before this class, I might not have been able to answer that question, but now I can. A few software I have grown to really like is; QR code, Padlet, Kahoot, BrainPOP, PowerPoint, Excel, Word, Google, and there are many more.

Quote

- Education is the most powerful weapon you can use to change the world.
