

## App Evaluation Write Up

Name of App: Matholia Tools

Evaluators: Kennedy Capps & Baylee Nahlen

Criteria	Comments
Title	Matholia Tools
Version	1.4.1
Publisher	Blue Ring Education
Audience	This could be used for all elementary grades. There are many tools that would fit each grade level.
Type	This is a tools app. There are so many math tools on the app for every grade level.
Curriculum	This app is for math.
Environment(s):	This would be great to use in the classroom while teaching lessons. It is a great thing for students to visualize and help you as the teacher explain math. This could be helpful for the parents to have at home if they needed to help their children with homework they could use the math tools offered on the app.
Cost	Free.
Describe the app	The app has everything you could possibly need to use when teaching math. First you select a grade. The grades listed are Kindergarten- Sixth grade. Once you select the grade level it takes you to a page with a ton of different math tools you can choose from. There are things like money counters, linking cubes, fraction tiles, base ten blocks, all kinds of tables, and so much more!
Our impressions of the app	We both LOVE this app! There are so many tools all in one place! It is hard for

## App Evaluation Write Up

	<p>some teachers to have a lot of hands-on tools in the classroom and this app has all you can think of! This will help students so much when learning all of the different math lessons. It is great to use for students to visualize problems. When students need help with something the teacher could have them get out the iPad and use some of the tools on the app. This app would help in a math classroom SO much!</p>
Does the app pass?	Yes the app does pass!
