

App Evaluation Write Up

Name of App: Scan QR Code

Evaluators: Kennedy Capps & Baylee Nahlen

Criteria	Comments
Title	Scan QR Code
Version	Not listed
Publisher	Yang
Audience	Anyone 4 years old and up.
Type	We would classify this app as a tool app. We say this because it can be used to enhance a lesson, it does not each anything.
Curriculum	Teachers could be creative and use this in many different content areas. They could scan prices and add them in math, they could scan book codes, and create their own codes for different objects.
Environment(s):	This app can be used in the classroom and at home. Anywhere there is a QR Code or an object you wish to create one for is where the app can be used. In class you could have a scavenger hunt and do many thing with it. This would be a great app to use outside of the classroom where students may be exposed to different QR codes. For example if they were to go to the store with their parents.
Cost	The app is free and you can \$0.99 to get rid of pop up ads.
Describe the app	When you open the app the camera pops up and it is ready to scan a QR code. You also have the option to create a QR code. If you push the create button it will take you to a new page where you will select what the code will be for. For example,

App Evaluation Write Up

	<p>some of the options are to create a code for a phone number, email, or location. After you select the item you wish to create you enter in the information and it will provide you with the code to link users to the phone number, email, or location.</p>
Our impressions of the app	<p>We had so much fun playing with this app! We looked up codes on the internet and scanned them. We also created a few codes. One code was to each of our phone numbers and it was amazing how great it worked! This is something that could be used in many ways be the teacher in the classroom. You could have math lessons to compare prices and do scavenger hunts where students would need to scan codes.</p>
Does the app pass?	<p>Yes the app passed.</p>
