

Clips

Storyboard:

1. Choose paper, any paper. Explain that it can be ANY paper.
2. Fold paper in half, hamburger style. Show the hamburger style. It does not have to be a perfect fold. Show how mine isn't.
3. Explain that the drawing utensil can be anything, but erasable things are better. Draw half shaped tear drop, show it to camera. Fix it, show that.
4. Cut out shape, with paper still folded. It does not have to be perfect.
5. Show shape once cut out. Show left over paper and the idea of reusing it.
6. Write "to" and "from/love" on the shape (Valentine).

Clips is being used to show students how to make a Valentine at a Valentines Day party. The valentines are simple but allow for students to decorate in however way they would like, since they are paper hearts.

iMovie

1. Sunny Weather
2. Cloudy Weather
3. Rainy Weather
4. Stormy Weather
5. Snowy Weather
6. Tornado Weather

***Pictures go with each weather type, along with music/sounds that match the "mood" of each weather.

Four other ways to use iMovie:

1. End of the year graduation video.
2. Welcome to (insert grade) video.
3. Informational, with lesson info.
4. Students can create movies as a project.

This iMovie project was designed to go with a lesson plan over the types of weather. It shows examples of weather and serves as a guide for students. Students will watch the video prior to the lesson.
