

No-Sew T-Shirt Bag!

Step by Step

1. Turn your shirt inside out, so when you flip it at the end your design is on the outside!
2. Cut the Sleeves off! If your t-shirt is thick you can cut one side at a time or cut both at the same time!
3. Cut out the neckline area!
4. Cut the fringe! Cut all the way through both sides of the t-shirt, and space them about an inch apart.
5. Tie your fringe.
6. Flip it inside out, so the design is on the outside and all your fringe is tucked in.
7. Go Shopping!

This No-Sew t-shirt bag is something students can make to help with the environment. This will be used by students in place of plastic bags. We are also reusing things we already have instead of buying something new. After students have learned about Human Impacts and plastic usage, students will be eager to create one and carry to the grocery store.
