

**Title:** codeSpark Academy: Kids Coding

**Version:** 2.32.00

**Publisher:** codeSpark

**Target Audience:** Ages 4 and up, would be a fun tool for first graders to use.

**Type of Software:** Tutorial

**Curriculum(s):** Could be an extra activity for the children to use in their free time.

**Cost:** The cost-range from \$3.99 up to \$119.19, but it is initially free to download

**Description of Software:** This “teaches the basics of computer programming through a variety of interactive learning activities including puzzles, games, step-by-step creative projects, game design and offline printables”

**Impression:** We think this is great for kids because it gives the option for parents to monitor exactly what the child is doing on the game. It also gives a variety of ways for the children to learn about the coding, in a manner that uses “no words”.

**Does the software pass?** Yes
