

Evaluation Write-up

Title: Padlet

Version: 96.0

Publisher: Wallwisher, Inc.

Target Audience: Ages 4+

Type of Software: Tool

Curriculum(s): Writing

Possible Environment(s): Single user, tool for teachers, students, and professionals.

Cost: Free/ You can upgrade to Padlet Pro for \$12.99 per month or \$99.99 per year.

Description of Software: Padlet is a digital canvas to create projects that are easy to share and collaborate on. Padlet works like a piece of paper. You can add videos, text, pictures, or insert documents on your padlet and customize your wallpaper. Things you can make with Padlet include Venn diagrams, discussion boards, portfolios, and many more. Teachers can create handouts that include a padlet and share the assignment with the class. Students can open up the app in class or at home and work on the assignment.

Impression: This app would be an excellent tool for teachers and older students to use. Even though it says it's appropriate for kids ages 4+, younger kids will have trouble navigating the app. It's great for writing prompts, lesson plans, timelines, etc. We liked how teachers can see who has opened their assignment, how long they worked on it, and if they have completed their work.

Does the software pass? Yes
