Evaluation Write-up

Title: Township: Farm & City Building

Version: 7.0.0

Publisher: Playrix

Target Audience: Ages 4+

Type of Software: Simulation

Curriculum(s): This app could be incorporated into a History lesson.

Possible Environment(s): Single user

Cost: Free

Description of Software: Build your dream town, harvest crops, process them at your facilities, and sell goods to build your town. You can explore the mines and get resources to find ancient artifacts. You can also run your own zoo and collect animals from around the world. You can build restaurants, cinemas, and other building to customize your own town.

Impression: This app would be a perfect simulation game for elementary school students. We think this will fit in perfectly with a history lesson about farming and Arkansas living. The sounds were not detracting and enhanced the game. There are step by step arrows telling you what to click on to help you get started. This app is very easy to learn and doesn't have ads that children can click on.

Does the software pass? Yes
