

Evaluation Write-up

Title: Tetris

Version: 3.0.15

Publisher: Electronic Arts

Target Audience: Ages 4 and up

Type of Software: Problem solving

Curriculum(s): Can be used to teach patience and basic problem-solving skills

Cost: Free to download, but there are different purchases in the app that range from \$1.99-\$99.99

Description of Software: This is a fun game where children and adults can pick their speed, and they figure out the best way to put the shapes together where there is no wasted space

Impression: We think this is a great game for kids! It would be perfect to build problem-solving skills in young children. We also thought this could be a good “cool-down” game when students are feeling very stressed or overwhelmed.

Does the software pass? Yes
