

Human Impacts Mini-Lesson

Grade Level: 7th

Curriculum Topic: Human Impacts

7-ESS3-2—Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.

Tools: Inspiration and Kahoot

Synopsis: I will use inspiration to create a visual for human impacts. I will start with various forms of human impacts and then go into examples which will include dates, locations, people, etc. I will link them all together so that the students can see many examples of human impacts and how they are all related. I will then pull up the Kahoot that I have created. The Kahoot will be a review for students to go over human impacts. There will be questions about the types of human impacts and what can be done to know and even prevent future catastrophic events from occurring.
