Educational Software Write-Up

Title- Monster Math

Version- 16.0.0

Publisher- Makkajai Edu Tech Private Limited

Target Audience- 1-3rd students

Curriculum- This app is aimed at primary math grades.

Cost- Free lite version with a $6.99 upgraded version.

Description of software- A fun game involving math problems where students have to solve problems to continue along in the story. There is practice for addition, subtraction, multiplication, and division. There is a multiplayer option so that students can play together. You can even select only to practice certain skills.

Impression of Software- As a future educator, I could see myself using this app to practice and drill math skills I have taught the students. Students could have fun while also reinforcing necessary skills for school. I would use this more during a free choice time with supervision.

Does the app pass? Yes.
