

- Duolingo
- Version 5.2.59
- Duolingo, Inc.
- Rated 4+
- Foreign Language
- Would be most effective in a Spanish or French class, but many other languages available for good drill and practice.
- Free, with ads.
- Fun, colorful, and easy-to-use, this app uses matching games and visual cues to help learners practice and expand on their vocabulary in a foreign language. The games vary from simple matching to vocal response and give the user options for a fairly customized learning experience. Covering the subject matter that they want to learn.
- This app was engaging and fun, encouraging the user to practice every day in order to maintain their “streak”. The pictures that are paired with questions feature a number of pop culture and historical figures that peoples from many different nations would recognize. The drills are repetitive, but with enough diversity in content to maintain interest. Each ad that flashes between games includes a label that says “This ad helps keep education free”, almost like an apology, and gives the user the option to upgrade to the ad-free version, but we get the impression that the free version is just as good and the ads aren’t terrible.
- Pass for sure.
