<div align="center">Mini Lesson #4</div>

Grade Level: 2nd

Curriculum Topic: Coding

Tools: Bee-Bot and Code-a-Pillar

Synopsis: For this mini lesson, we would use the described tools (tech toys) to practice programming and coding, as well as expanding their fine motor skills. The students would be separated into groups/partners and take turns playing with the tools together. This could be used during centers when I may be working one on one with other students. The students will receive basic practice with programming and coding with these tools.
