- It's a productivity app
- This app could be used in a lot of subject areas to help student organize ideas and materials for various tasks, but the biggest potential we see for the app would be for planning out written work such as essays, reports, and creative writing prompts.
- Free
- Productivity app that is colorful and simple, it offers in-app purchases but overall doesn't harass the user, just helps organize whatever content the user puts into it. The customizable colors make it easy to visually organize ideas and aspects into categories.
- Our impression was that this app would be a great way to get kids to start using graphic organizers to help them communicate their projects and ideas in a way that makes sense. Using it as a tool for brainstorming written assignments or multi-faceted projects would help develop good study habits and give kids an edge if they pursue higher education.
