

- Name: Splice
- Version: 3.5.3
- Publisher: GoPro, Inc
- Target Audience: 4+ but we agreed this application was better for 2nd grade and up
- How does it fit into curriculum: It can help students learn to make and edit videos.
- Possible Environment and Why: This application would be good for younger elementary students up to adulthood.
- Cost: It is free to download with no in app purchases.
- Description: This is an application that creates, uses, and edits videos/movies made on a tablet or phone. It is made by GoPro and has options for transitions, sound effects, music, and text within the videos.
- Pass or Fail: Pass because it was easy to use and has tutorials.
