

Other ways to use Photo Story

1. Aside from a lesson, Photo Story can be used to create an About Me for the teacher at the beginning of the year. Or it can be used for the students to create an About Me if they were student of the week.
2. Another way to use Photo Story is to create quizzes. The teacher would create a quiz with questions and the students would answer the questions on a sheet of paper.
3. A third way to use Photo Story is to create digital photo slideshows of class work or projects. These would be neat to have for the students and teacher to reflect on everything they had completed that school year.
4. Another way that Photo Story can be used in the classroom is to write a report to share factual information. Similar to a PowerPoint, this type of Photo Story allows you to use your own voice and other sounds or music to enhance the project.
