

**Title:** Elevate (Drill and Practice)

• **Version:** (if there is one or if it is one of a series)

Brain Training

Version 5.24.0

• **Publisher or Producer:**

Elevate Labs

• **Target Audience:**

4+ per publisher.... More like 8+ because of reading and comprehensive writing skill testing.

• **Type(s) of software with your justification:**

This application, we believe, is a drill and practice type of software. This app was made to help the users refresh their brains while also speeding up their responses.

• **Curriculum(s):**

This can fit into any curriculum because there are games to fit them all. The only downside is that to access all of the games, the user will have to upgrade to a subscription.

There are comprehension games, math games, and much more that can be used to help work out the user's brain.

• **Cost:**

Free

In-App Purchases

- 1 year of Elevate \$39.99
- Elevate Subscription \$4.99
- Elevate Subscription \$44.99
- Elevate Subscription \$2.99
- Elevate Subscription \$26.99
- Elevate Lifetime \$149.99
- Elevate Lifetime \$89.99
- Elevate Subscription \$7.99
- Elevate Subscription \$4.99
- Elevate Subscription \$6.99

• **Write a paragraph or two describing the software:**

The software gives you the option to "personalize your training plan", but you can skip this and go straight to rating your own abilities. The key areas this app focuses on are reading, writing, speech, and memory. Each area has categories such as "averaging" in math

and "speed" in memory. This leads the user to games that help them work on that skill. One of the tools under writing allows the user to find mistakes in a sentence and correct it. Once the user has completed a practice, they can see their progress within that category.

- **Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class:**

This software seems very well thought out and very well organized. It is easy to navigate through the app, and we love how many different practices there are that cover a large range of subjects. The screen design is very simple and minimalist, so we think it might be more appealing to older elementary students. We thought that this app would be perfect as a way to get the class ready for learning. Before the lesson starts, students could log on to this software and get their brains tuned in for learning. It could also be used for students who need extra practice in a particular subject, and the teacher can keep up with their progress.

- **Does the software pass APPS:**

We would say that this software passes APPS since it is put together very well and works with no issue. It is a great way for students to practice particular skills until they feel proficient.
