Evaluation Write UPS

Title : **Kidtopia**

Version : **2.8.4**

Producer : **Paper Boat Apps**

Target Audience : **kids and toddlers – early learning experience**

Type(s) of software**: Discovery Learning – because the audience is for early learners, so they are new to the information**

Curriculum : **abcs, alphabet training, spelling, addition, subtraction, number values, patterns, shapes and colors**

Environments : **single user / one computer classroom**

I feel like this app can be put in a classroom computer for centers to practice skills they already know and play games that are appropriate if Kindergarten/ 1st graders (1st grade is my grade I picked) and it is a single user because a kid can easily navigate this for practice.

Cost: **6.99/month or 4.99/ yearly – 7 day free trial**

Describe software : **Kidtopia has various games, and curriculum material for early learners. It also has LIFE skill games, and puzzles such as: bake and decorate cakes, coloring, design pizza etc. It also has information about planets, dinosaurs. And my personal favorite feature is ROLE PLAY games. A viewer came become an astronaut and live the life of an astronaut and adventure it !**

Impressions of software ; **I absolutely loved this app because it has so much to do, learn and adventure with. You can become anyone and life their life with the role play feature, practice life skills, and academic skills all in one app! I believe it is worth the money to have on a classroom computer!**
