Title : **ABA Problem Solving – Same or Differences**

Version : **2**

Producer : **Optiqal**

Target Audience : **early learners and special needs**

Type(s) : **Problem solving – it is problem solving because the app is having you pick out the picture that doesn't belong out of 4 images**

Curriculum : **anything that has to do with knowing the difference of something, or recognizing images**

Environments : **single user or one computer classroom. It is a single user because it is very easy to navigate and play with. It can be a one computer classroom if you were to do centers, it would be the perfect app for a sensory focus.**

Cost : **4.99**

Description of software : **whenever you open ABA – problem solving, it has a welcome screen and it has a bar that says begin and you click it and it starts the process of asking viewers to pick out the one that is different. In the app description in the app store it says this app is made for children with autism and that is so cool that I got my hands on an app that is needed for students that have special accommodations with in the classroom**

Impression : **this app is great! It has a feature where you can put in your own pictures and make your own so this app can be made personal. It also keeps up with your score on how many right and wrong which is cool and this can be a good app for a chill time or free time in the classroom or just learning to find differences and similarities.**
