Synopsis: The students will watch the money song on YouTube. After they watch the YouTube video, I will pair everyone up. In their pairs, they will create their own money song. They will need to record themselves singing or rapping their song on iMovie. They will make their song about each coin and their attributes. They will need to add a title page, pictures of the different coins, and fluff it up!! This is a fun way to get all the students involved and a great way to help them remember the coins.
