Explain Everything

Version: 5.3.6

Publisher: Explain Everything sp. z o.o

Target Audience: The app says ages four and up can use it, however after playing with it we believe it would be more beneficial for older ages (around 3rd grade and up). There are many features that require reading and skills that younger students might not have yet.

Curriculum:

Cost: The app is free to download and use for 14 days. The user can upgrade for $12.99 a month or $107.99 a year. There is a paid version that is $13.99 called Explain Edu.

Description of Software: Explain Everything is an interactive whiteboard. It allows users to collaborate using voice chat and advanced recording. You can join other's projects by using a code or link. The user can create a video project from scratch or by using a template. A lesson or lesson plan can be created and then a voice recording can be placed behind the project for an easier way to teach a lesson.

Impressions of Software: The software seems fairly easy to use after some practice. There were no glitches or lagging problems. The already-made templates were very user-friendly and made it easy to create new projects. You can easily share projects with other users and have them collaborate or edit them. The main focus of this app is create videos and audible lessons while working out examples or a presentation. A concern is the price. The app only allows 12 days of a free trial and then you must pay for a subscription.

Does it pass? Yes, it passes APPS.
