Clips Synopsis

### How to Add Fractions

The how-to video on adding fractions is for students to use as a reference. Students can access it at any time when they need it. Students can watch the video to help them complete their homework where they do not have the help of the teacher. Students can also watch the video to help them complete their classwork before asking for the teacher's help or in case the teacher is busy or out for the day. The video will always be available for students to look back for whenever they need help with adding fractions.
