

# Favorite Food Graph

**Grade:** Kindergarten

**Subject:** Math

**Tools:** Google Forms and Excel

**Description:** The students will fill out a google form where they put their favorite food. I will have them choose from 5 different foods so it can make the graph easier. After everyone has filled out their favorite food, we will work together on making a graph. After the graph is made I will ask the students how many people liked a certain food, or even how many more people liked one food than the other, and I will also ask if there is one that is the same amount.
