
Filmmaker Pro Video Editor

Version: 6.6

Publisher: Samer Azzam

Target Audience: The app says ages four and up can use it. We think most students around this age and higher would be able to use this app.

Curriculum: This app could be used for any subject. It's a great app to make video projects. Students could make group videos explaining a country, to make a music videos, or commercials.

Cost: The app is free to download. You can use the free version for as long as you want. There is a free trial of 3 days for the pro version. You can buy a subscription for \$5.99 a month, \$35.99 a year, or \$69.99 for a one time purchase all-access version.

Description of Software: This app allows users to make videos. You can add previously recorded pictures and videos into one video. You can add music, text, voice recordings, and much more to enhance the video. Users can choose videos from their camera roll, or they can use the app to record new videos. Videos can be saved or shared with others.

Impressions of Software: We really enjoyed this software because you could still access a lot of the features with the free version. It did crash once, but other than that everything went smoothly. We think this is a very easy app to use and could be a very helpful tool in the classroom.

Does it pass? Yes, it passes.
