

Fall Frenzy Week

<i>Date</i>	<i>Class Activity</i>
10/21	<i>Monday Madness</i>
10/22	<i>Tuesday Clue Day</i>
10/23	<i>Wacky Wednesday</i>
10/24	<i>Throwback Thursday</i>
10/25	<i>Finally Friday, Fall Funday</i>

Monday Madness

Monday Madness is the start to our Fall Frenzy Week. Students will draw a "mad" scientist to research. Each student will research their scientist and write a speech for them as if they're receiving an award at a ceremony. Students will then dress like their scientist would have and give the speech on class day. The other "scientists" will form the audience and there will be a podium and red carpet for the event.

Tuesday Clue Day

Students will arrive at class to find a **Locked-door Mystery**. Students must solve problems with the scientific method and think critically to answer the clues to unlock the prize.

Wacky Wednesday

Students will arrive at class to discover that the space time continuum has malfunctioned and the day is going backwards. They will learn methods of understanding problems by starting at the solutions. Students have to figure out how experiments were done by observing the reactions and thinking critically. Please have your students wear old clothing, it might get a little messy.

Throwback Thursday

Students will travel back in time and make an old fashioned telescope like Galileo.

Finally Friday, Fall Funday

Students will have a Fall Party. Supplies needed:

- Chips
- Sodas
- Candy
- Desserts
- Waters

Please Email if you provide any of these.
