|------------------------------------|---|
| Curriculum | By 3 rd grade students are beginning to gather homework and venture into various activities. Teachers can introduce this app in their class to ensure due dates are met. Parents can include extracurricular activities then students can see where they can fit in time to study and complete homework. |
| Cost | Free |
| Description of the Software | The objective of this app is to organize. Instead of a list it creates grids. With Mind Magnets Info Organizer one can create to do sheets, track events, make notes, brainstorm, anything you can think of to get organized. |
| Impression of the Software | The attraction to this app is the visual colors and grids. Other than that it is a basic organizing device. Pictures, such as emojis are not an option, nor is voice over. Since it appears very basic this could be a good starting point for elementary students to begin tracking and organizing their activities. |
| Pass APPS | As far as apps go it passes the test. It functions well for its purpose and is simple to learn. We just don't see a lot of add in other than organization. |
